

Cyber Resilience: Vulnerability Management

Secure your Assets

With Cybercriminals seizing every possible opportunity to exploit known vulnerabilities to gain unauthorized access to an organizations' environment, systems and data, vulnerability management is no longer an option.

It is becoming a must for every organization to have a stringent vulnerability management program that evaluates and addresses the weaknesses resulting from software vulnerabilities or face potentially serious reputation damages, regulatory infringements or even severe financial impact to the business.

Detect, Classify and Protect

- Automate Vulnerability scans
- Assess Active and Passive Networks
- Comprehensive assessments eliminate blind spots
- Classify assets, their related vulnerabilities and associated risks
- Analyze and prioritize risks
- Protect assets based on risk exposure and business impact
- Reduce threat risk exposure
- Meet compliance, regulations and governance mandates

Our Vulnerability Management solution is not only vulnerability scanning and remediation workflows. It is a robust program that includes the policy, processes and procedures that help you measure up to elevated compliance levels and minimize exposure to existing vulnerabilities.

On-Premise

- **Develop** "Continuous Vulnerability Management" Policy, Processes and Procedures
- **Install** Tenable IO Vulnerability Management solution
- **Enable and Configure:**
 - Schedule Scanning
 - Vulnerability Modules
 - Reporting
 - Dashboard

Cloud Based

- **Develop** "Continuous Vulnerability Management" Policy, Processes and Procedures
- **Provision** Tenable IO Cloud Services
- **Deploy** Vulnerability On-Premise Agent
- **Enable and Configure:**
 - Schedule Scanning
 - Vulnerability Modules
 - Reporting
 - Dashboard

Cyber Resilience: Vulnerability Management

How does it work and what to expect?

Planning and Design

- Design and document “Continuous Vulnerability Management” Policy, Processes and Procedures
- Design tenable.io Vulnerability Management solution and deployment plan

Deploy and Configure

- Install tenable.io Vulnerability Management software
- Configure tenable.io Vulnerability Management software
- Configure Scanning, Dashboards, Alerts and Notifications

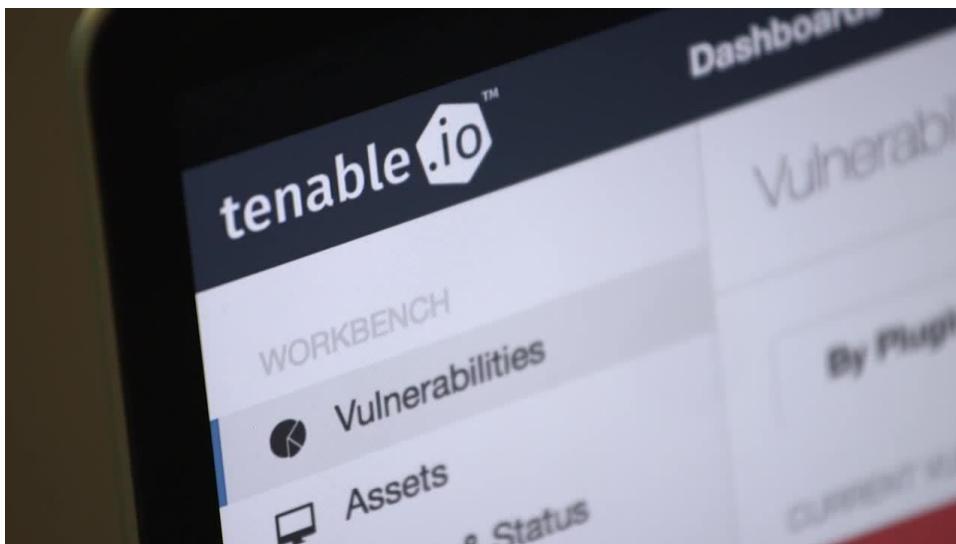

Maintain and Enhance

- Discovered Vulnerabilities Insights
- Enhance Scanning
- Improve and fine tune Notifications
- Enrich Risk assessments and prioritization

Benefits

- Streamlined Vulnerability management program
- Centralized Vulnerability management platform
- Covers all assets mobile devices and IOTs too.
- On premise and Cloud assets
- Maintain compliance across hybrid, private or public cloud infrastructures
- Dynamic Asset Tracking
- Asset-Based vulnerability tracking
